

Seal & Protect

-  Stain Resistant
-  UV Stable
-  Water Based
-  Hydrophobic

Coval Natural Look Sealer helps prevent stains and topical mold, mildew, and algae with an effective, EPA approved antimicrobial, Polyhexanide Biguanide (PHMB).

Coval Natural Look Sealer is an easy to apply, water-based, hydrophobic sealer. The transparent barrier provides a long lasting, breathable surface that will repel liquids. The added antimicrobial agent adds resistance to mold, mildew and algae that cause staining and odors.

This impregnating, UV stable sealer can be spray-applied to virtually any interior or exterior surface. Coval Natural Look Sealer will leave behind a stain resistant, easy to clean surface.

Red wine on sandstone, and red wine on fabric, easily wiped away when pre-treated with Coval Natural Look Sealer.

Coval Natural Look Sealer helps prevent stains and topical mold, mildew, and algae for years.

For more information visit us at www.covaltechnologies.com or call +1-281-566-4277.

Hydrophobicity to All Surfaces: Coval Natural Look Sealer is super hydrophobic and repels water and other liquids. Ready to use, Natural Look Sealer requires no measuring or mixing, and one gallon covers 300-400 square feet depending on the substrate.

Architectural Preservation: Coval Natural Look Sealer creates an invisible barrier and can be applied indoors and outdoors to virtually any surface.

Antimicrobial Additive: Coval Natural Look Sealer stops the growth of algae, mold, and mildew, and the smells they create. Businesses will lower maintenance costs and reduce cleaning chemicals, water, and manpower to keep a building looking its best.

Achieve ultimate protection on nearly any substrate with related Coval products. Contact an authorized Coval product representative at sales@covaltechnologies.com or visit the website.
